DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 6, 2006 has been entered.

Response to Amendment

2. Claims 1, 2, 4, and 6-14 are pending.
3. Support for applicant's claim amendments may be found in the portion of the specification cited by applicant at page 5 of the remarks November 6, 2006.

Response to Arguments

4. Applicant's arguments, see the remarks, filed November 6, 2006, with respect to the final Office action, have been fully considered in light of applicant's amendment and are persuasive. In particular, claim 1 has been amended to recite 10 μm , overcoming the objection. Claim 1 has further been amended to read: "...wherein the compressing and a transfer of the layer containing the functional particles from the transfer support to the support occur at the same time." As correctly argued by applicant, Yukinobu neither teaches nor suggests this feature. Consequently, the prior art rejections are withdrawn as well.

Allowable Subject Matter

5. Claims 1, 2, 4, and 6-16 are allowed.
6. The following is an examiner's statement of reasons for allowance: The prior art neither teaches nor suggests the claimed method in which transfer and compression of the functional particles occur simultaneously.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. JP 2003-001783 A was cited by applicant in the IDS filed December 24, 2003. While this reference explicitly teaches the instantly claimed invention, it is not a patent and is not "by another." Consequently, this reference cannot be applied to reject the claims. Further, this publication does not have any related US applications or patents that would raise double-patenting concerns. US 2002/0037399 A1 and US 2002/0086138 A1 are both cited as representative of the state of the prior art.
